
Auston T. Parker

Objective-

My experience with the Miracle League volunteer program, has inspired me to study Mechanical Engineering at North Carolina Agricultural and Technical University, or North Carolina State. I hope my education and engineering can be used to benefit people of disabled and underserved communities, from war veterans to challenged kids. An acceptance into one of the prestigious merit programs at NCSU or NCAT would greatly benefit my contribution to these communities.

Distinctions/Accomplishments

Panther Creek Highschool, Athletic Participation Award,
Triangle 6 Athletic Conference, Academic Award

Activities
